

# FLOTATION BATH-BASE

**PS-FBB**

## FEATURES

- Maintains stable and uniform temperature across the bath to prevent tissue distortion during flotation
- The black interior enhances contrast, allows easy visibility and identification of tissue sections
- Rapidly reaches the desired temperature, reducing preparation time and improving lab efficiency
- User-friendly interface ensures accurate temperature setting and real-time monitoring
- Durable, high-quality construction ensures longevity and resistance to frequent use in lab environments
- Smooth surfaces and accessible design make routine cleaning quick and hassle-free

## DESCRIPTION

The Flotation Bath, model (Base) is a laboratory instrument designed for use in histology and pathology laboratories during the preparation of paraffin-embedded tissue sections. It provides a controlled heated water surface that aids in the smooth flattening of tissue ribbons before slide mounting. The instrument is constructed with a corrosion-resistant body, an integrated heating system, and a temperature control mechanism to ensure operational consistency. Compact in design and easy to operate, the Flotation Bath supports routine histopathology workflow and is suitable for Laboratory applications.

## TECHNICAL SPECIFICATION

Parameter	Details
Keypad/Buttons	Membrane Keypad
Display	1.3-inch OLED Display
Voltage	230VAC ± 10% 50/60Hz Single phase
Operating Current	2.5A
Bath Capacity	2 Lt
Power	600W (Approx.)
Fuse	4A
Factory Default Temperature	Bath 24°C
Maximum Temperature	Bath 60°C
Additional Features	Audio Visual Alarms, Error Codes, Program Backup After Power cuts
Dimensions (L X W X H)	437(mm) x 272(mm) x 142(mm)
Weight	7kg (approx.)

## ORDERING INFORMATION

Equipment Name	Catalog No
Flotation Bath-Base	PS-FBB
